2. The following is an examiner's statement of reasons for allowance:

The present invention is directed to a polymerase chimera comprising functional amino acid fragments of at least two different polymerases, wherein the functional amino acid fragments are active in the polymerase chimera, a domain having polymerase activity is derived from the first polymerase and a domain having 3'-5' exonuclease activity is derived from the second polymerase, and wherein the amino acid sequence of the polymerase chimera essentially corresponds to SEQ ID NO: 8. No prior art of record either teaches or suggests a polymerase chimera comprising functional amino acid fragments of at least two different polymerases, wherein the functional amino acid fragments are active in the polymerase chimera, a domain having polymerase activity is

derived from the first polymerase and a domain having 3'-5' exonuclease activity is derived from the second polymerase, and wherein the amino acid sequence of the polymerase chimera essentially corresponds to SEQ ID NO: 8.

In view of the absence of either teaching or suggestion of such a polymerase chimera comprising functional amino acid fragments of at least two different polymerases, wherein the functional amino acid fragments are active in the polymerase chimera, a domain having polymerase activity is derived from the first polymerase and a domain having 3'-5' exonuclease activity is derived from the second polymerase, and wherein the amino acid sequence of the polymerase chimera essentially corresponds to SEQ ID NO: 8 the present invention is novel and non-obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
